PROFILE SUMMARY

Python and Django Developer with hands-on experience in building web applications using Django, Django REST Framework (DRF), React.js, and MySQL. Developed AI-powered and CRUD-based applications through academic and personal projects. Passionate about backend development, RESTful API design, and writing clean, maintainable code.

EDUCATION

Central University of Haryana

Master of Computer Applications

July 2023 - June 2025

Haryana, India

Bareilly College, Bareilly

Bachelor of Computer Applications

July 2019 – June 2022

Uttar Pradesh, India

PROJECTS

Major Project: TrashTrack – AI-Powered Smart Waste Management System [Github Repository](#)

Technologies Used: Python, Django, Machine Learning, JavaScript, HTML, CSS, SQLite, Leaflet.js

Project Overview:

Developed an AI-powered smart waste management system that classifies waste using a machine learning model, monitors smart-bin fill levels, and provides a web dashboard for real-time waste management and bin tracking.

Key Features:

- Developed a machine learning model to classify waste into different categories.
- Built an interactive dashboard using Leaflet.js to display bin locations and waste status on a map.
- Integrated an automated notification system to alert administrators when bins reach capacity.

Todo App [Github Repository](#)

Technologies Used: Python, Django, Bootstrap, JavaScript, HTML, CSS, SQLite.

Project Overview:

The Todo App is a web-based task management application built using Django, Bootstrap, and SQLite. It allows users to efficiently add, update, and delete daily tasks through a simple and intuitive interface. The application focuses on productivity and ensures smooth task management with a clean and responsive UI.

Key Features:

- Developed a full CRUD-based task management system using Django (Create, Read, Update, Delete).
- Designed a clean, responsive interface using Bootstrap for a smooth user experience across devices.
- Organized the project using Django's MVT architecture for maintainability and scalability.

TECHNICAL SKILLS

Languages: Python, JavaScript

Frameworks & Libraries: Django, Django REST Framework (DRF), React.js

Web Technologies: HTML5, CSS3, Bootstrap

Databases: MySQL, SQLite

Tools & Platforms: Git, GitHub, Docker, Visual Studio Code

EXPERIENCE

Web Development Intern

08/2024 – 09/2024 [Remote]

Prodigy Infotech Private Limited

- Developed responsive frontend layouts using HTML5, CSS3, and JavaScript.
- Integrated RESTful APIs to dynamically fetch and render data in web apps.
- Utilized Git and GitHub for version control and codebase management.

ACHIEVEMENTS

- Secured 2nd place in the College Technical Quiz Competition.
- Coding Club Coordinator (Central University of Haryana)
